Trading as JF Nuclear Limited

CE&I Design Engineers

In this role you will be responsible for designing new & modifying existing plant and equipment.

This role requires the ability to employ innovative new technologies and solutions, working on a range of areas including: programmable electronic systems, process instrumentation, safety CE&I systems, communications and CCTV, sampling & analytical instruments, and environmental monitoring.

Working within a team, as a CE & I Design Engineer your duties will include:

- Providing key design authority support to assure the safety and quality of design solutions
- Working within & leading design teams in the provision of new facilities
- Delivering core design activities

The essential requirements for this role are:

- A CE&I (Control Electrical and Instrumentation) based engineering qualification
- Professional Engineering status (or be working towards obtaining it)
- Lateral thinking skills
- Industrial experience in a similar role

Whilst not essential, a CE&I engineering background gained in a nuclear, chemical or heavy industrial environment would be beneficial to your application.

Apply by e-mailing your CV and covering letter to sarah.town@jfrh.co.uk and referencing "CE&I design engineer", or write enclosing your CV to Sarah Town, JFRH, Derwent Road, York Road Business Park, Malton, North Yorkshire, YO17 6YB
